

TECHNICAL DATA SHEET FOR PROCURE PC22

TYPICAL APPLICATIONS

PC 22 is specially formulated for high strength, general purpose bonding of most plastics, rubbers and other common substrates. Recommended for use on assemblies where parts are not close fitting, for uneven or porous surfaces, or when time is required to align parts before curing.

PRODUCT DESCRIPTION

PC 22 Instant Superglue is a high viscosity Ethyl Cyanoacrylate based adhesive. PC 22 is suitable for bonding a wide range of materials.

PROPERTIES OF UNCURED MATERIALS

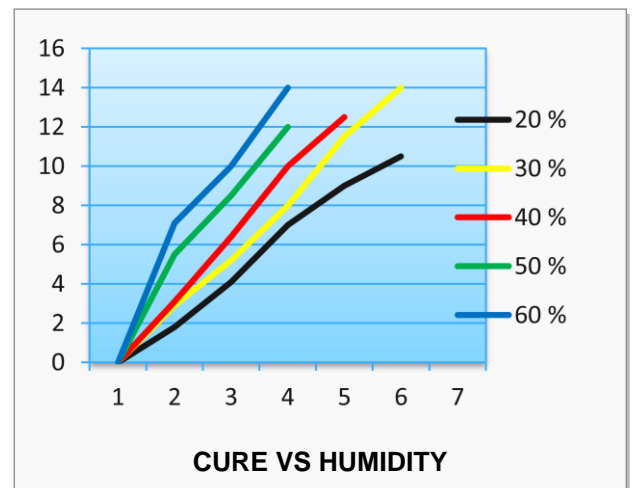

Chemical type	Ethyl
Appearance	Clear
Specific Gravity	1.06
Viscosity cPs ¹	
– range	2175- 2750
– typical value	2500
Fixture Time (secs)	20
Full Cure (hours)	20 - 60
Flash Point (°C)	24
Shelf Life @ 5°C (months)	> 85
Max Gap Fill (mm)	12
Operating Temperature Range (°C)	0.20
¹ Brookfield LVF, spindle 3, speed 30rpm	-50 to +80
² ISO 6922	

TYPICAL CURING PERFORMANCE

Typical Speed:	
Steel/steel	<60 seconds
ABS/ABS	<40 seconds
Rubber/Rubber	<30 seconds

CURE SPEED VS. ENVIRONMENTAL CONDITIONS

Cyanoacrylates require surface moisture on the substrates in order to initiate the curing mechanism. The speed of cure is reduced in low-humidity conditions. Low temperatures will also reduce cure speed. All figures relating to cure speed are tested at 21°C.

CURE SPEED VS. SUBSTRATE

The speed of cure of Cyanoacrylates varies according to the substrates to be bonded. Acidic surfaces such as paper and leather will have longer cure times than most plastics and rubbers. Some plastics with very low surface energies, such as polyethylene, polypropylene and Teflon® require the use of Procure 77 Primer (see PC 77 TDS for further info).

CURE SPEED VS. ACTIVATOR

Activators 780 and 750 may be used in conjunction with cyanoacrylates where cure speed needs to be accelerated.

Cure speeds of less than 2 seconds can be obtained with most cyanoacrylates.

The use of an activator can reduce the final bond strength by up to 30% Testing on the parts to measure the effect is recommended.

CURE SPEED VS. BOND GAP

PROCURE/REACT Cyanoacrylates give best results on close fitting parts. The product should be applied in a very thin line in order to ensure rapid polymerisation and a strong bond. Excessive bond gaps will result in slower cure speeds. PROCURE/REACT Cyanoacrylate Activators may be used to greatly increase cure speeds (see PC780 and PC750 TDS for further info).

TECHNICAL DATA SHEET FOR PROCURE PC22

TYPICAL ENVIRONMENTAL RESISTANCE HOT STRENGTH

PROCURE/REACT cyanoacrylates are suitable for use at temperatures up to 80°C. At 80°C the bond will be approximately 70% of the strength at 21°C. The bond strength at 100°C is approximately 50% of full strength at 21°C.

CHEMICALS / SOLVENT RESISTANCE

Cyanoacrylates exhibit excellent chemical resistance to most oils and solvents including motor oil, leaded petrol, ethanol, propanol and freon.

Cyanoacrylates are **not** resistant to high levels of moisture or humidity over time.

STORAGE

Store in a cool area out of direct sunlight. Refrigeration to 5° C gives optimum storage stability.

REMOVAL OF CURED CYANOACRYLATE

Cured cyanoacrylate may be removed from most substrates, and parts disassembled, with a debonder.

It is not possible to fully remove cyanoacrylate from fabrics

PRESENTATION

Cyanoacrylates are supplied in 20g, 50g, 500g and bulk packs

DIRECTIONS FOR USE

Bond speed is very fast so ensure that parts are properly aligned before bonding.

Activators may be required if there are gaps or porous surfaces. Some plastics may require application of primer.

Ensure parts are clean, dry and free from oil and grease.

Product is normally hand applied from the bottle. Apply sparingly to one surface and press parts firmly together until handling strength is achieved. As a general rule, as little cyanoacrylate as possible should be used – over application will result in slow cure speed and lower bond strength.

Please contact your representative for further advice on dispensing solutions.

GENERAL INFORMATION

For safe handling of this product consult the Material Safety Data Sheet.
