

## AEROSOLS

## Cleaning and care **WIKO® STAINLESS STEEL MAINTENANCE**

WIKO® STAINLESS STEEL MAINTENANCE is used as a maintenance and protection agent for matt and polished stainless steel surfaces indoors and outdoors. The permanent protective film prevents corrosion and has an anti-static, dust-repellent and dirt-repellent effect.

- Perfect care and sealing of all stainless steel and painted surfaces
- Environmentally friendly and silicone-free

## Application areas

- Provides flawless cleanness and brilliant gloss in buildings, encasements made of stainless steel, coated vehicle surfaces, kitchens, commercial kitchen, for example hoods, instruments, conveyor bands, elevators, workshops, etc.
- Household maintenance of high-gloss coated surfaces
- Removing of lubricant films, for example at extractor hoods

## Sizes / article number

400 ml can

AESP.D400

## Application

The designated surfaces have to be free of dirt, rust, oil and grease. Shake the aerosol can intensively. Perform a spray sample. Apply the spray crosswise from a range of 20 to 30 cm. Afterwards, wipe the surface with a clean and absorbent cloth and polish until high gloss appears.

## Storage & Durability

The shelf life is, at the optimum storage temperature of +5 °C to +25 °C in the closed original container, a maximum of 12 months. A higher storage temperature leads to a significantly lower durability. The storage temperature must not fall below +5 °C.
